SECTION 1. 196.196 (1) (c) of the statutes is amended to read:

196.196 (1) (c) 1. A price-regulated telecommunications utility may not increase its rates for services under par. (a), except for basic message telecommunications service, for a period of 3 years after electing to become price regulated. Following the initial 3-year period for services under par. (a), except for basic message telecommunications service, and at any time for basic message telecommunications service, a price-regulated telecommunications utility may increase its rates for those services to the extent that the change in the revenue weighted price indices does not exceed 2 percentage points less than the most recent annual change in the gross domestic product price index, as published by the federal government. The commission shall, by rule, create a penalty mechanism for up to a one percentage point increase in the percentage offset for inadequate service provided by or insufficient investment made by a price-regulated telecommunications utility. The commission shall, by rule, create an incentive mechanism for up to a one percentage point decrease in the percentage offset to encourage infrastructure investment by the price-regulated telecommunications utility. For a telecommunications utility with more than 500,000 access lines in use in this state at the time of electing to become price regulated, the percentage offset to the change in the gross domestic product price index shall be 3 percentage points and the penalty mechanism and incentive mechanism shall be up to 2 percentage points. No earlier than 6 years after September 1, 1994, and no more frequently than every 3 years thereafter, the commission may, following notice and an opportunity for hearing, by rule increase or decrease the gross domestic product price index

percentage offset by a maximum of one percentage point in any 12-month period to reflect any statewide changes in the productivity experience of the telecommunications industry. The commission shall promulgate rules to identify the factors that the commission may consider in determining changes in the productivity experience of the telecommunications industry. If application of the price regulation index formula achieves a negative result, prices shall be reduced so that the cumulative price change for services under par. (a), including prior price reductions in these services, achieves the negative result.

2. Annual permitted price increases under this paragraph may be deferred and accumulated for a maximum of 3 years into a single increase. The first permitted increase after the telecommunications utility elects to become price regulated shall be limited by the most recent annual change in the gross domestic product price index, less 2 percentage points, plus or minus any penalty or incentive adjustment. For a telecommunications utility with more than 500,000 access lines in use in this state, the first permitted increase shall be limited by the most recent annual change in the gross domestic product price index, less 3 percentage points, plus or minus any penalty or incentive adjustment. The increase in any rate element may not at any time exceed 10% or the increase in the gross domestic product price index, whichever is greater.

3. A rate change under this paragraph shall take effect 45 days after the date on which notice is received by the commission. A telecommunications utility shall notify customers of a rate change under this paragraph by a bill insert that is included in a bill no later than the first billing provided after notice of a rate change is submitted to the commission. A telecommunications utility may file only one rate increase under this paragraph during any 12-month period.
